**SLOPE
ANALYSIS**

Elevation Profile Data Extracted from a Google Earth Pro LIDAR based digital elevation model. Elevations were first calculated in feet for a higher degree of accuracy then converted to meters. Measured elevations ranged from 407 to 457 feet, or 124.1 - 139.3 meters. Numbers displayed below the profile are the two significant digits of the metric elevation ranging between 24 and 39.

Timing Mats are located at every Kilometer Mark
