7. COURSE AND COMPETITION FACILITIES

7.1 Course

The course for Half Marathon is fast, pretty, compact, and accessible. The start and finish area – the Embankment – is the Gate to Old Riga and is right on the main river Daugava. It's wide, spacious, and in the heart of the city making it easily accessible for Championship runners, fans, and spectators! Right after the start we cross the Akmens tilts (Stone Bridge), allowing perfect UNESCO Heritage Old Riga Views, and head to Pārdaugava, the other bank of river Daugava, known for its contrasting architecture combining the National Library, wooden architecture, and skyscrapers with romantic gems like Dzegužkalns, the Cuckoo Hill. We return to Old Riga over Vanšu bridge (Suspension Bridge) offering a spectacular Panorama of the City. The good news is that Vanšu bridge and Stone bridge are pretty much the only hills on the course since the rest of Riga is pretty flat. The compact course includes most of Riga's central landmarks making it exciting not just for participants, but spectators.

The course for 5 km race is essentially covering the first part of the Half Marathon course and share the start and finish area at the Embankment.

The Road Mile course winks eye to the Art Nouveau buildings of the centre of Riga, Unesco World Heritage, and the finish line presents the magnificent background of the Freedom monument.

7.2 Start / Finish Procedures

The Call room will be located in the Technical University building close to the start area. Water will be available in the call room. After the race, and after having passed through the mixed zone where athletes will also return the transponders, they will return to the Technical University building to Teams Area for their clothing.

7.3 Drink and Refreshment stations

There will be 3 Personal Refreshment Stations along the Half-marathon course at approximately after each 5km interval point, starting from 7th km mark. A water only table will also be available after the last personal refreshment tables.

7.3.2 Personal Refreshments for Half-marathon:

Tables at the personal refreshment stations will be arranged as follows and at a distance of about 2m between each one:

- Personal Refreshment tables will be in place in alphabetical order according to a countries three letter code (i.e. Latvia = LAT)
- There will be 1-3 countries per table depending on the number of competing athletes per country. Each country's space will be indicated with the sign and 3 letter ISO code.

More information about water and personal Refreshments stations will be distributed upon arrival.

Delivery of Personal Refreshments to the stations can be arranged by the LOC or directly by the Team Officials.

Delivery by the LOC

In this case, personal drinks must be handed in to the LOC on Sunday 1st October, 08:00 at the latest, at the Information desk in the hotel or TIC. The LOC will then place the bottles on the respective tables. Bottles must be clearly labelled with the athlete's name, country, bib number and refreshment station. Labels can be collected at the CID together with spare empty bottles if needed.

Direct delivery by Team Officials

A maximum of two (2) Team Officials per country will be allowed to be present at the Personal Refreshment station. A specific pass will be issued. Teams will receive upon arrival more information about the location of the Personal Refreshment station.

10.7 Other Medical Information

Medical License

Latvian legislation **doesn't require** any permit or temporary medical license for physicians traveling together with athletes.

Vaccinations

There are **no current restrictions and requirements** due to COVID-19 or any other illness in Latvia. The rule for mandatory use of face masks at public places and medical institutions has been lifted.

Medical Importations

Natural person is allowed to bring into the country medicinal products (except for narcotic analgesics, psychoactive substances, as well as anabolic steroids, testosterone, growth hormone or their analogues) in their original packaging for up to 12 months of use, if the medicinal product is imported from a European Economic Area country, or for up to 6 months of use, if the medicinal product is imported from a third world country or any other country outside of European Economic Area. If the medicinal product has been purchased in a third world country or any other country outside of European Economic Area, a prescription is required for both prescription and non-prescription medicines. Prescription isn't required for medicinal products brought into Latvia from European Economic Area, but LOC advises to take confirming documents to avoid any type of delay. If the amount of medicinal product brought in from another country (any country) exceeds three packaging units, the person must certify the use of medicinal product by written certification (free form) indicating personal use of medicinal product and confirmation that the medicinal product is not a narcotic analgesic or psychoactive substance.

Narcotic and psychoactive substances have a strict regulation system in Latvia. Entering Latvia from a country which is a Schengen Agreement country, a natural person is allowed to bring into the country medicinal products for personal use which contains substances included in Schedule II (narcotic analgesics and psychoactive substances) and Schedule III (psychoactive substances), if the person has received a certification for their use from a competent authority of this country (for example, in Latvia this certification is issued by the Health Inspectorate). The allowed amount of these medicinal products aren't specified in this case. If the person is entering Latvia from a country not within Schengen Area, then the maximum amount for medicines containing substances included in Schedule II is for personal use up to 14 days and Schedule III for personal use up to 30 days. Prescription or any other kind of confirmation that without doubt confirms the necessity for this medication and the person that will be using it is required. Medicinal products included in Schedule I are prohibited to bring into the country.

No Needle Policy

During the entire duration of the World Athletics Road Running Championships, any injection to an athlete's body of any substance:

1. must be medically justified, to include physical examination by a certified medical doctor, diagnosis, medication, route of administration and appropriate documentation;

2. must respect the approved indication of the medication = no off-label administration or prescription;
3. must be administered by a certified medical professional accredited by the LOC, in an official medical facility of the event unless authorized by the World Athletics Health and Science Department Representative or Competition Medical Delegate :
or
4. administered by the Member Federation team physician in an official medical facility under the supervision of an LOC medical staff member unless authorized by the World Athletics Health and Science Department Representative or Competition Medical Delegate.

In either option, the administration must be declared and recorded by the LOC medical staff and the World Athletics Health & Science Department Representative using a specific form.

The WA No needle Policy and the declaration form can be found in the list of exhibits.

11. DOPING CONTROL

Doping Control will be conducted according to World Athletics Rules and Anti-Doping Regulations (latest editions available on World Athletics website) and under the supervision of World Athletics Doping Control Delegate. Both blood and urine doping controls will be carried out in Doping Control Stations located in the athletes' hotel and at the competition venue.

12. SAFEGUARDING

The SO will be their first point of contact for any safeguarding concerns in relation to Team Officials, Athletes and members of the Member Federation's delegation at the World Athletics Road Race Running Championships Riga23.
